BRUNO POPPOLO

Product / Backend Engineer | Systems & APIs
Barcelona, Spain (Remote) • hi@brunopop.dev • brunopop.dev

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience in high-growth tech environments, specializing in payment infrastructure, API migrations, and financial reconciliation systems.

Strong backend background in Node.js, TypeScript, and PostgreSQL, combining hands-on engineering with production troubleshooting, workflow automation, and cross-functional problem-solving across Engineering and Operations.

TECHNICAL SKILLS

- **Core Stack:** Node.js, TypeScript, React, PostgreSQL/MySQL, Sequelize, REST APIs.
- **Infrastructure:** Docker, AWS (basic), Kubernetes (basic), GitHub Actions.
- **Integrations:** Stripe API, SaltoKS (Smart Locks), HelloSign, Notion API, Customer.io, Timekit, SendGrid.
- **Tools:** Slack, Notion, Linear, Git, Postman, Retool.
- **Foundations:** C#, .NET, Java, Object-Oriented Programming (OOP).

PROFESSIONAL EXPERIENCE

COHABS — Remote
Head of Product Operations — 2021 – 2026

Joined Cohabs as a Full-Stack Engineer and progressively took on broader responsibilities across payments, product and operations, becoming Head of Product Operations while building systems, automations and integrations that supported the company's infrastructure during its expansion across 6 countries.

- **Core Systems & Workflow Automation**: Enhanced critical workflows across Finance, CX, and Property Operations through engineering improvements, reducing manual work and increasing operational reliability across international markets. Built an internal CLI (Node.js) for automation and monitoring, including mass rent indexations, smart lock configurations, and other recurring processes.
- **Payment Reconciliation & Revenue Protection:** Managed and monitored €5M+ in active financial balances across international Stripe accounts. Built backend tooling integrating Notion and Stripe to resolve payment discrepancies and recover €300k+ in stuck funds.
- **Infrastructure & API Migrations:** Led end-to-end infrastructure migrations in response to third-party API deprecations, transitioning 2,000+ active virtual IBANs and modernizing the Stripe Payment Methods API to maintain payment continuity across international markets.
- **Production Ownership & Troubleshooting**: Served as the final point of escalation for production issues, repairing corrupted data. Defined and tracked operational KPIs, including touchless payments, to monitor reliability and identify areas for improvement.

Tech Stack: Node.js, TypeScript, React, SQL, Docker, Kubernetes, AWS, Third-Party Integrations: Stripe/SaltoKS/Hellosign/Customer.io/NotionAPI/Slack/Linear/Stream.

FREELANCE / Independent Contractor **Remote**
Full-stack Developer **2018 - 2021**

- **API Integrations & Development:** Designed and implemented custom RESTful API integrations for diverse client projects, focusing on backend reliability and data consistency.
- **Frontend Modernization:** Built projects to master the modern tech stack, including React, Tailwind CSS, and ES6+, bridging the gap between legacy systems and modern web standards.

Tech Stack: ES6+, React, Node.js (Express), Stripe/Dropbox/Google Maps API, Tailwind.

INES CRM **Montevideo, Uruguay**
Software Developer **2016- 2018**

- **Android Development:** Developed the company's first native Android application from scratch under senior mentorship, successfully delivering a functional mobile solution for the CRM's 30,000-user ecosystem.
- **Backend & Microservices:** Migrated critical legacy services from Delphi to C# / .NET microservices, significantly improving system maintainability and backend performance.
- **Full-Stack Support:** Implemented end-to-end features by developing backend logic and supporting frontend adjustments, ensuring seamless data flow and consistent functionality across the platform.

Tech Stack: Java (Android), C#, .NET, SQL Server, Delphi.

EDUCATION

ORT University **Montevideo, Uruguay**
Computer Analyst / Programmer Analyst **2013 – 2016**

- Technical degree focused on Software Engineering, including Software Design, Implementation, and Data Structures.
- Strong foundations in Object-Oriented Programming (OOP), Design Patterns, Algorithms, and Database Management.

ORT University **Montevideo, Uruguay**
Information Technology Analyst **2017**

- Advanced coursework focused on Full-Stack development (Node.js, MongoDB, Angular) and Mobile development (Android).

LANGUAGES

- **Spanish:** Native.
- **English:** Full Professional Proficiency.
- **Italian:** Fluent (Spoken).
